SUPPLEMENTARY INFORMATION: The items of discussion in the committee's agenda are as follows:

The Groundfish Oversight Committee will discuss possible adjustments to sector management measures and issues related to setting Acceptable Biological Catches (ABCs), Annual Catch Limits (ACLs), and Accountability Measures (AMs). After receiving reports from the Groundfish Advisory Panel and the Recreation Advisory Panel, the Committee will continue

to develop options to improve sector monitoring, including both at-sea and dockside monitoring. They may discuss different funding mechanisms, appropriate coverage levels, and full retention of allocated groundfish species. With respect to ABCs/ACLs/AMs, the Committee will consider additional sub-ACLs for the scallop fishery for stocks such as SNE/MAB windowpane flounder and SNE/MA winter flounder. As directed in the letter from the National Marine Fisheries Service approving Framework 47, Committee members will also discuss additional reactive AMs for wolffish, SNE/MA winter flounder, and Atlantic halibut. The Committee may begin a discussion of recreational fishing measures for FY 2013. Options identified by the Committee will be included in a future management action or actions that will be considered by the Council in the fall of 2012. The Committee may also discuss other business, such as issues related to Georges Bank yellowtail flounder management.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.
